

## How do I send a MMS Mobile Marketing Campaign?

Wizemobile fully manages its client campaigns; we will work with you to generate your advertisement/voucher/message copy to ensure it has the desired call to action before creating your MMS Mobile Marketing Message either from supplied copy or a detailed brief. This message is then sent through our secure MMS Gateway, we configure your message to display on all MMS supported handsets adding an automated unsubscribe function. Once your MMS Mobile Marketing Message has been created you can then have it delivered automatically via publishing a mobile number or short code on your POS (point of sale material), traditional media or website.
